

ABSTRACT

The invention comprises:

An introducer for delivering into the vasculature a straight or bifurcated stent or prosthesis;
5 a method for delivering into the vasculature a straight or bifurcated stent or prosthesis; a method of treating and aneological disease using a bifurcated stent; an endoluminal stent having perpendicular hoop members, each hoop member formed of wire in a sinuous configuration, at
10 least some of juxtaposed apices in neighboring hoops being secured to one another, such stents also forming axially aligned segments in straight stents, and segments of bifurcated stents in particular embodiments. Certain
15 embodiments of such stents also include barbs, fabric covering and radiopaque markers.
